Company profile

SEVI Exceptional Botanic specializes in producing, packaging and trading organic products in convention of aromatic and medicinal plants. The foundation of our company in 2019 is deriving from love for Greek nature and its authentic flavors. Both the cultivation area and the installation of our facilities are located in a small settlement, at the altitude of 400 meters, that is named Teichos and its situated at the outskirts of Drama.

The soil and climate conditions of the area are ideal for the cultivation of our aromatic and medicinal plants and can ensure their exceptional authentic quality. The cultivation of our aromatic and medicinal plants is in convention and we never use conventional fertilizers and pesticides. We harvest the crops by hand so that they can maintain their quality and then we leave them dry naturally in a special designed area.

The package is airtight and throughout the whole process all safety protection measures are ensured from harvesting stage to the packaging use.

Our authentic and organically processed products are addressed to those who wish to eat in harmony with nature.

The certified biological cultivations in convention of aromatic and medicinal herbs of **SEVI Exceptional Botanic** as well as its facilities are located at the eastern part of the district area of Drama in Ano Pyxari a complex of traditional settlements which is located in the area of Teichos.

Love and passion for our end product are guiding us through the whole process. Hence, with great respect to nature and our region we only use organic techniques regarding the production and management of our biological aromatic and medicinal herbs. We harvest the crops by hand and we process them by using natural techniques all the way.

The well-designed installation of our facilities comply with all the official global rules concerning the safety and security measures that also ensures the integrity of our organic products in the marketplace. We use bagging by sealed air that is also placed in card packaging, so that our pure organic and medicinal herbs maintain their quality, the aromas and rich flavor of Greek nature.

Oregano

Oregano

Greek oregano (*Origanum vulgare ssp*) is a perennial and herbaceous plant as its quality is considered one of the best in the world. Hence, Oregano is the most sought after, having excellent quality, not only when it is self-made but also when it is cultivated in the Greek environment. It has been used for thousands of years as a culinary condiment, as well as a powerful healing herb.

Oregano has been known since antiquity, it was considered so great that the name oregano comes from the words mountain (mountain) and ganos (laiprocity), meaning a plant that lubricates the mountain. During the Ottoman era, the one who ate oregano prevailed.

Oregano is flush with vitamin E, K, A, B3 and B6 and is one of the herbs with the highest content of vitamin C. It also contains manganese, magnesium, calcium, zinc, potassium, iron and phosphorus as well as b-carotene. It is an excellent source of fiber. Their antioxidants, thymol and carvacrol, have strong antibacterial antifungal activity and support the immune system.

Greek mountain tea

Mountain tea

Greek mountain tea, in terms of its systematic classification, belongs to the genus *Sideritis*, in the family Lamiaceae. In ancient times the name “iron” was used to refer to various plants that were believed to have the ability to heal serious wounds from iron objects such as arrows, swords.

The name of the plant genus (iron) is mentioned for the first time by Dioscorides. The genus *Sideritis* has about 140 known species. Ten of them are annuals, the rest are perennials. The plant is aromatic and medicinal.

The flowering shoots of the plant are used as decoctions and are considered tonic for the human body. Mountain tea is one of the most popular teas. It has anti-inflammatory, bacteriostatic and antioxidant effects and is considered digestive, thermoplastic, antiperspirant, tonic, detoxifying, anti-irritant, anti-iron due to its iron content, while it has a special effect in favor of the respiratory system. Organically, the drink is very tasty, aromatic and can be consumed hot or cold with sugar, jelly or plain.

Rosemary

Rosemary

Rosemary grows naturally in the Mediterranean, thrives in large areas of southern Europe and is cultivated throughout the world.

Rosemary is an aerobic evergreen shrub that reaches up to 1.5 meters in height. Rosemary thrives in both mild, warm and cold climates. The name of the plant is a combination of the words tree and frankincense while the Latin name rose sea.

Rosemary was known to the ancient Greeks who used it as an aromatic plant and for the wreaths of the winners of the games. The ancient Greeks considered it a gift of Aphrodite. In ancient Greece and Russia, rosemary was used, among other things, to strengthen incense, which justifies the fact that to this day it is known as the herb of incense and concentration.

According to folklore, he took his name from the Virgin Mary, who left her cloak on the sea. By the next morning, the flowers of the bush had become plentiful and have since been renamed rose of Mary.
