**More than 100 years of helping people have a
good time with food**

100

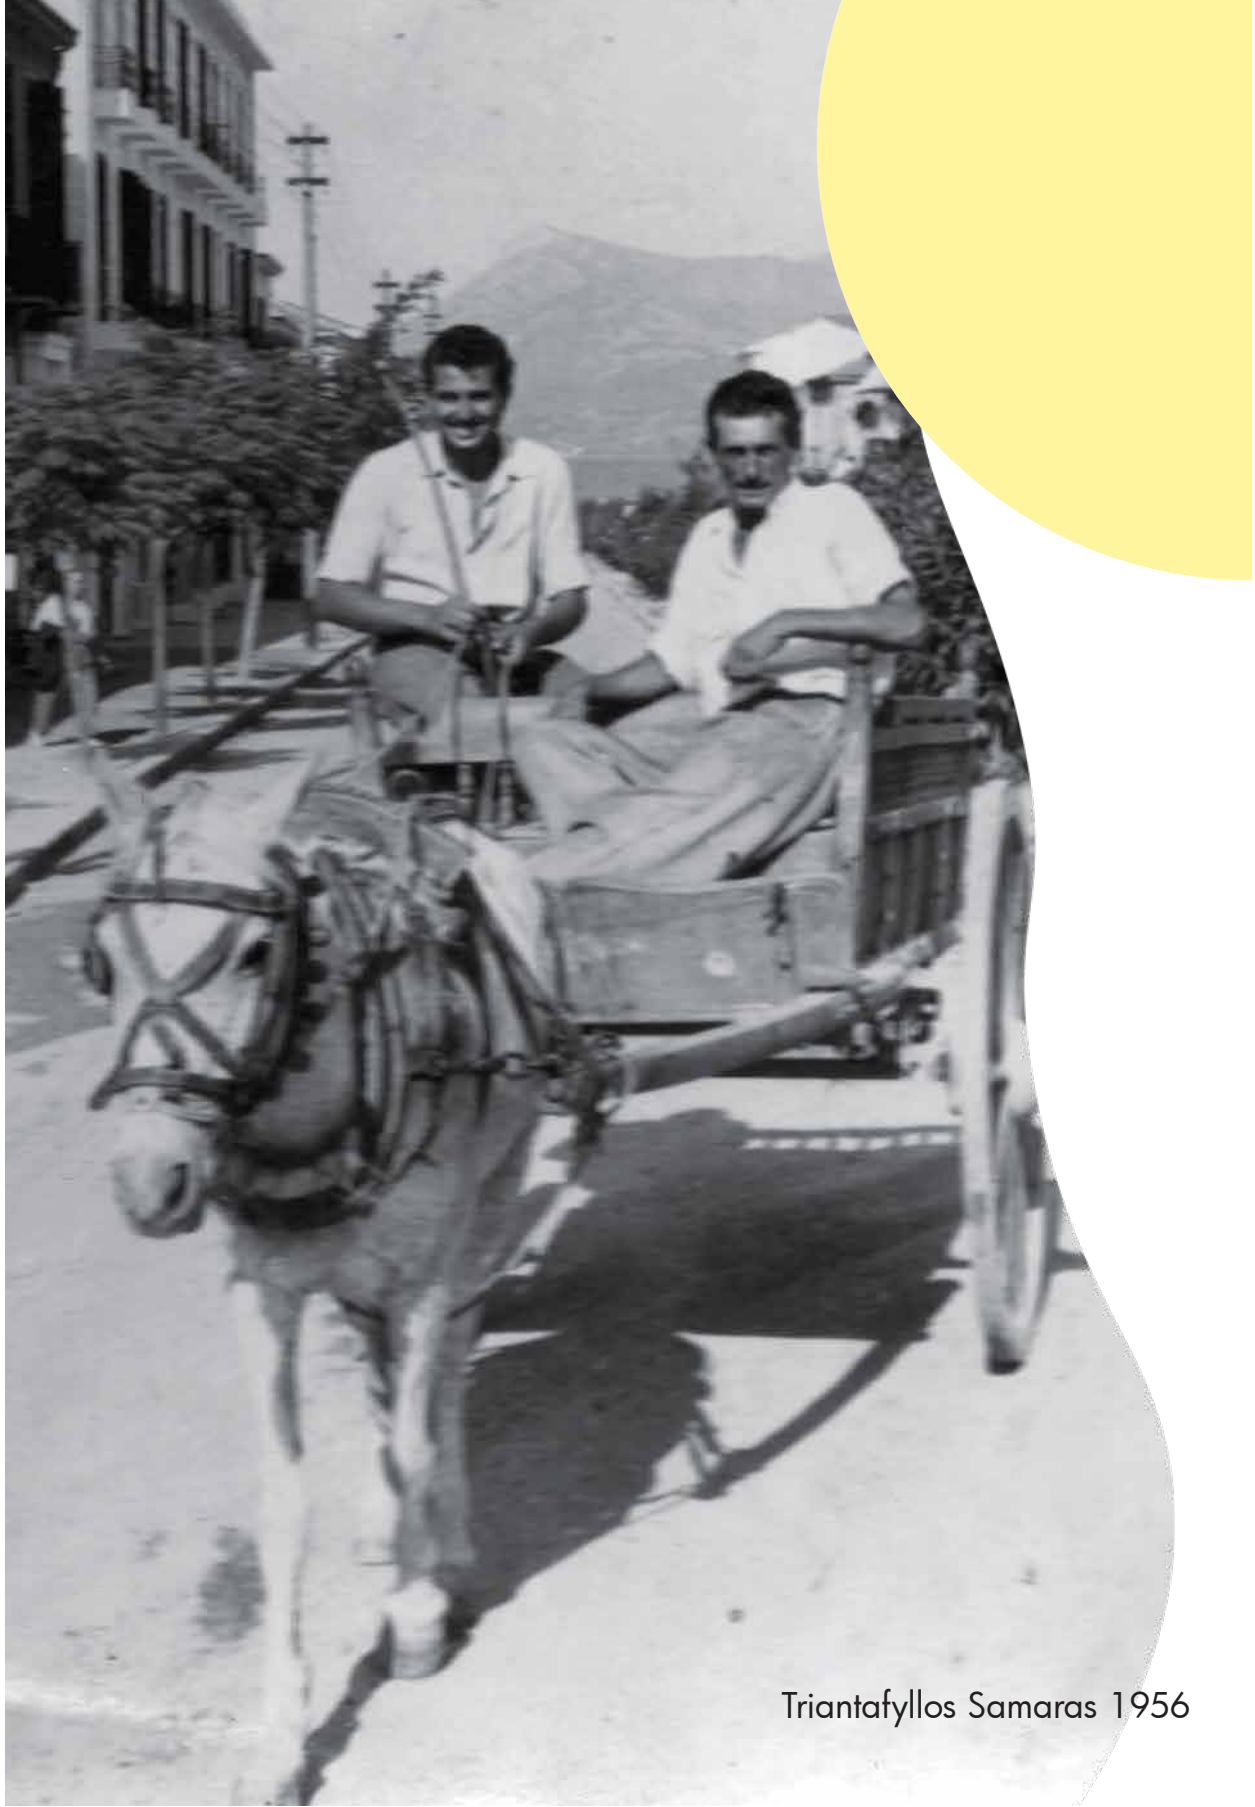

From Constantinople, to Evia and for the last 15 years in Moschato Attica, our family has a long tradition in the production of Greek food products, from the farm to table.

Olives, pickles, olive oil, dried fruits, herbs, nuts, legumes and pasta are some of the products we produce and package. In addition to these, we sell a wide range of products necessary for the food industry and the HORECA market.

By having a wide variety of products we are able to meet the needs of our customers in Greece and in more than 20 countries around the world. Being the largest supplier of pickled products in the Athens Central Vegetable Market gives us the competitive advantage to understand market trends and adapt accordingly.

A flexible business with production plants in 4 regions of Greece, we work quickly and efficiently to constantly create new products (low salt, vegan, snacks, etc.). With our inhouse design agency we are able to customize products in less than 48 hours, to help you with your private label needs.

Triantafyllos Samaras 1956
