LUXURY ORGANIC — ORGANIC — BASIC

APOMAS... Greek nutritional treasures carefully selected by us to travel all over the world!

Oliveoil, honey, herbs, nuts, dried fruit, all of them key components of the Mediterranean diet that contribute to health, well-being and quality of life in today's hectic and challenging world, are the products of our family company, APOMAS.

Product quality and safety are ensured by personally performed inspection checks through out the production process, always with respect for nature and natural resources.

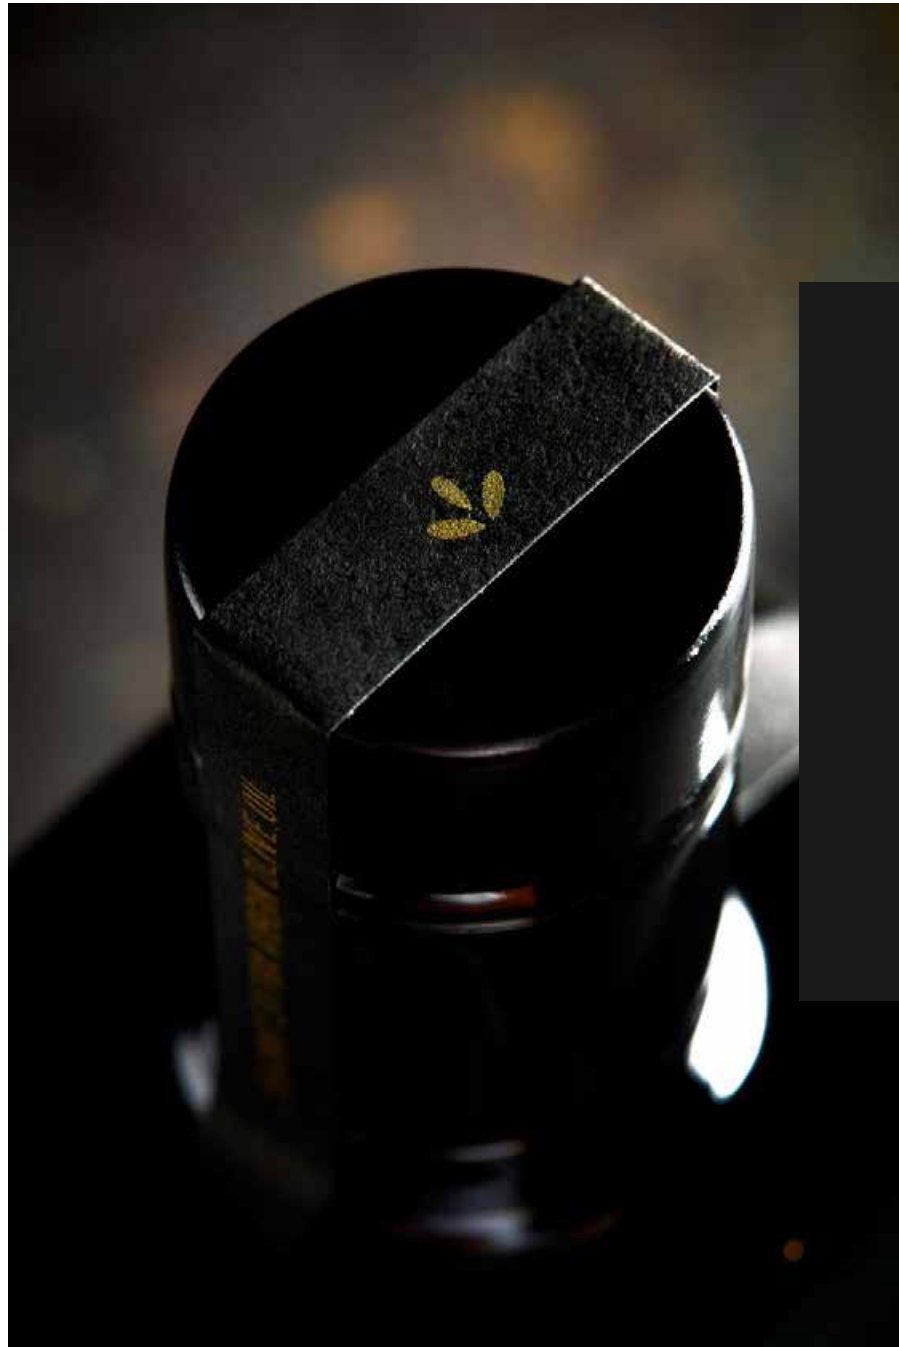

We are perfectly familiar with the methods of organic and sustainable farming and well aware of the importance of pure organic goods both for nature and for man, as this is the philosophy of life that we have been brought up with, therefore we can supervise and check every stage of the creation of our products. This means that we meet producers in person, conduct thorough product quality controls, make sure that the highest standardization specifications are maintained, and use environmentally friendly recyclable packaging.

In that way we can guarantee the value of each and every one of our nutritional proposals. APOMAS... for everyone!
